

Ankush Patil

Network and Infrastructure Security Analyst

Toronto, ON | 647-510-1980 | ankushgp@icloud.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

Network and Infrastructure Security Analyst with enterprise experience securing endpoint, identity and cloud environments at scale. I focus on uncovering security misconfigurations and control failures by digging into EDR, SIEM, IAM and cloud-native signals to understand what actually broke and why. With a background in software engineering and automation, I bring a production-informed approach to security analysis that leads to practical remediation and real risk reduction across AWS and Azure.

CORE SKILLS

Security Domains: Network Security, Endpoint Security, Infrastructure Security, Incident Response, Security Misconfiguration Analysis, Zero Trust, Identity Security

Tools & Platforms: CrowdStrike Falcon EDR, CyberArk Application Control, Splunk SIEM, Wireshark, Firewalls, AWS, Azure, CloudWatch

Security Concepts: EDR Detection & Response, Firewall Policy Analysis, IAM, MITRE ATT&CK, CSPM, SIEM Monitoring, Root Cause Analysis, Security Control Failures

Programming & Automation: Python, PowerShell, Bash, SQL, Log Analysis, Security Automation

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst Co-op (Data Protection & Endpoint Security)

Intact Insurance, Canada | Jan 2025 – Apr 2025

- Analyzed enterprise endpoint security posture using CrowdStrike Falcon, identifying unmanaged assets and outdated sensor deployments across large-scale corporate environments.
- Investigated endpoint protection failures and security misconfigurations, determining root causes and recommending remediation actions to improve coverage and hygiene compliance.
- Produced monthly security metrics and compliance reports, tracking endpoint health, remediation progress and control effectiveness for security leadership.
- Reviewed and classified 130,000+ enterprise applications (100K Windows, 30K macOS) within CyberArk Application Control, identifying malicious, unauthorized and approved software.
- Developed and enforced application control policies, reducing enterprise attack surface and preventing unauthorized execution.
- Supported data protection investigations and security operations workflows, assisting with incident triage and response activities.

Software Engineer (Security-Focused Engineering)

Persistent Systems, India | Feb 2022 – Jan 2023

- Monitored authentication, system, and network logs using Splunk SIEM to detect brute-force attempts and anomalous geographic access patterns.

- Automated network exposure scanning using Python to identify unauthorized open ports and generate daily security posture reports.
- Implemented SQL Server Transparent Data Encryption (TDE) and role-based access control (RBAC), enforcing least-privilege data access policies.
- Assisted incident response activities including server isolation via firewall rules and traffic analysis using Wireshark.
- Supported malware remediation, vulnerability patching, and post-incident security improvement initiatives, including DLP and access control enhancements.

PROJECTS

Security Architect & Cloud Researcher | Build Roulette (2025 – Present)

- Designed a production-informed cloud engineering platform documenting real-world security decisions, architectural trade-offs and failure modes.
- Authored Engineering Decision Records (EDRs) analyzing cloud security architectures, observability cost discipline, identity design and scaling risks.
- Architected security-first cloud designs using short-lived credentials, least-privilege IAM models and filter-first logging pipelines.
- Conducted applied cloud security investigations across AWS and Azure, documenting misconfigurations, operational risks and troubleshooting workflows.

CERTIFICATIONS & TRAINING

- AWS Certified Cloud Practitioner
- Google Foundations of Cybersecurity
- CrowdStrike Falcon Platform Training
- MITRE ATT&CK Detection & Investigation Training
- Zero Trust & Endpoint Security Training

EDUCATION

Seneca Polytechnic

Postgraduate Certificate – Cloud Architecture and Administration | 2025–2026

Georgian College

Postgraduate Certificate – Cybersecurity | 2024

SVKM's Institute of Technology, Dhule

Bachelor of Technology – Computer Engineering | 2022
